

Find Me

Sanctus Real

save yourself from falling
as you fade from black to white
if you lose yourself to everything
lose yourself to everything
you'd find me.
ya found me save yourself from falling
safe from here with me
to see the bigger picture
as you remain to be set-free
if you lose yourself to everything
lose yourself to everything
you find me
if you lose yourself to everything
lose yourself to everything
you find me
in the middle of the darkest night
in the storms
in the places that you thought you'd hide
through it all, I have never ever left your side you find me in the middle of the darkest night
in the storms, in the places that you thought you'd hide
through it all, I have never ever left your side
...find me
("save yourself from falling")
...you find me in the middle of the darkest night
in the storms, in the places that you thought you'd hide
I have never ever left your side
...you find me in the middle of the darkest night
in the storms, in the places that you thought you'd hide
I have never ever left your side
