Evening Star

All India Radio

We will sail on forever
On to the land of the evening star
Into the endless we ride
Unveil the darkness behind
Abandoned glory hidden, castaway we ride
Now will the sky surrender
Forever through the never
A silent whisper echoes through my restless heart tonight
I will see the glory rise
We'll be one tonight
Don't you shut your eyes in silence
Tonight gather near, come and live your fear
In a land of desire your heart filled with fire
You live for the right to be free
We will sail on forever
On to the land of the evening star
In a land of desire your heart filled with fire
The land of the evening star
Now and forever after
Asylums filled with laughter
Suspicion haunts my dreams and echo through my mind
This starlit gaze reminds me
Are you so blind you can't see?
The winds of change my friend will blow for you in the dead night
I will see glory rise
We'll be one tonight
Don't you shut your eyes in silence
Tonight gather near, come and live your fear
In a land of desire your heart filled with fire
You live for the right to be free
We will sail on forever
On to the land of the evening star
In a land of desire your heart filled with fire
The land of the evening star
In a land of desire your heart filled with fire
You live for the right to be free
We will sail on forever
On to the land of the evening star
In a land of desire your heart filled with fire

The land of the evening star
