Pandemonium

Kreator

Pandemonium all around
Can't you fell it coming down
Pandemonium in my brainOver and over and over again
Over and over and over again
Over and over and over again
Over and over and over againAnd now you know the answer
And now you see the truth
Swallow this bitter pill
As all religion dies for youAnd all the things that happened
In all those times long gone
Gave birth to life like lies
Apocalyptic pandemoniumPandemoniumPandemonium in the air
God has left us in despair
Desperate could not stand the painOver and over and over again
Over and over and over again
Over and over and over again
Over and over and over againNow that your world is burning
Now that it ends in tears
Inferno has arrived
Nothing can make it disappearAnd all the things that happened
In all those times long gone
Gave birth to life likes lies
Apocalyptic pandemoniumPandemoniumA psychodrama is dragging you
Out of a life surreal
A better future waits for you
A life that might have beenSo give your soul and you may live
Limitless fantasies
This celebration of the night
Can light your shattered life if you believeAnd now you know the answer
And now you see the truth
Swallow this bitter pill
As all religion dies for youAnd all the things that happened
In all those times long gone
Gave birth to life like lies
Apocalyptic pandemoniumPandemonium
PandemoniumA psychodrama is dragging you
Out of a life surreal
A better future waits for you
A life that might have beenSo give your soul and you may live

Limitless fantasies
This celebration of the night
Can light your shattered life if you believe
