Always You

James Ingram

Seems like yesterday
We were still children with all our dreams
Tomorrow's dreams
Only yesterday you and I promised each other love
Forever love
But now you're gone
And our dreams are scattered like the leaves of fall
And I wish I knew what happened to them allChorus:
Cause no matter where I go or what I do
There's always you
No one but you; it's always youThings change, people change
Growing up lovers can grow apart
So far apart
We dreamed different dreams
There I was watching you drift away, so far away
But I believe
That a love like ours was somehow meant to be
And I'll see the day when you come back to meRepeat ChorusBut I believe that a love like ours was somehow meant to be
And I'll see the day when you come back to meRepeat Chorus
