Abstract Vision

Welcome
this transmission
from a fallen star
otherwise known as ArcturusLight has departed
from this black sun
But please put us on
to bring darkness down
from your head and homeOur enterprise a success
as return is no option
our eyes were removed
for our own safetyThe distance too great
for you to hear our cries
nevermind take this lamp
we are beyond lightWe learned so little
of inhuman culture
before disappearance
went right through usThe mothership
boarded by fools
we escape space
in order to reach
our destinationAnd if you are listening
please tell us about the time
where and when we exist
no moreFor when you go
we go with you
via wormholes
