Real Life

Vitamin C

Certain, genuine, almost positive
Right definite, sincere
Broke vitality, truth humility
That's not what's happening here
Ooh, ooh, this is real life
Ooh, ooh, this is real life
I'm sitting here waiting, wondering where you been
Don't you know you're late again?
Sitting here thinking, figuring you would call
The phone don't ring at all
I'm not a girl who's living in a fantasy world
So tell me are we fictional, fact
'Cause right now I gotta know
(I gotta know)
I wanna know where we're at
Get a grip baby, we're no rehearsal
It's not a game, we are not playing virtual
When are you going to wake up and realize?
This is real life, this is real life
Have honey would never be true love
I can almost never be in love
I tell you straight up, not telling you twice
(Telling you twice)
This is real life, uh, this is real life
(This is real life)
You're blowing hot and cold
And I don't know where you're coming from
What planet are you living on?
And I'm not the girl of a type who will forgive and forget
(Have I, have I got you attention yet?)
I'm not a girl whose living in a big dream world
This time there's no compromise
So if you want me for good, you better open your eyes
Get a grip baby, we're no rehearsal
It's not a game, we are not playing virtual
When are you going to wake up and realize?
This is real life, this is real life
Have honey would never be true love
I can almost never be in love

I tell you straight up, not telling you twice
(Telling you twice)
This is real life, uh, this is real life
(Real life)
Certain, genuine, almost positive
