Tell Tale Heart

New Found Glory

Don't tell me
What it's like to love someone
A different song for a different girl
And to think I might be wrong
Tell tale heart again
Words like these won't win
These words and hearts
You would come over to talk
We'd act like there is something to say
I've learned that time can heal your wounds
But the reminder of a scar will stay
Stay
Right here, right by me
Stay
The flame has died
Stay
Right here, right by me
Stay
The flame has died down
Don't tell me
What it's like to love someone
A different song for a different girl
And to think I might be wrong
Tell tale heart again
Words like these won't win
These words and hearts
You would come over to talk
We'd act like there is something to say
I've learned that time can heal your wounds
But the reminder of a scar will stay
Stay
Right here, right by me
Stay
The flame has died
Stay
Right here, right by me
Stay
The flame has died down
