Infinity

Anthony Smith

Just how far does the universe go?
Does it ever end? You say you wanna know
Just how high can you count
Before the numbers all run out?Who built the pyramids? Do aliens exist?
Where does God come from?
One more phenomenonIf you know how strong my love is
And your heart and mine can comprehend
Just how long I'm gonna feel like this
Then you'll know what infinity is then you'll knowThey say time, goes on and on
Even after we're long gone
And there's a black hole up in space
That pulls so strong, light can't escapeWho built the pyramids? Do aliens exist?
Where does God come from?
One more phenomenonIf you know how strong my love is
And your heart and mine can comprehend
Just how long I'm gonna feel like this
Then you'll know what infinity is then you'll knowThey'll find the answers to all those mysteries
But they won't understand what's between you and meWho built the pyramids? Do aliens exist?
Where does God come from?
One more phenomenonIf you know how strong my love is
And your heart and mine can comprehend
Just how long I'm gonna feel like this
Then you'll know what infinity is then you'll know(Then you'll know)
Then you'll know what love is
