# Empty Stairs

## Saybia

Empty stairs in a worn out house
That's where she stays
Where she hides out
Locked up safe
She explores her pain
Until she leaves
To explore the night
That's all she knows
It's a poisoned roseIt's all she wants
When she glides into the night
But all she needs is to open up her eyes
And she knows it's there
It echoes in her mind
She will be found
When her feet hit the groundLocked up safe
She explores her pain
Until she leaves
To explore the night
That's all she knows
It's a poisoned roseIt's all she wants
When she glides into the night
But all she needs is to open up her eyes
And she knows it's there
It echoes in her mind
She will be found
When her feet hit the groundIt's all she wants
When she glides into the night
But all she needs is to open up her eyes
And she knows it's there
It echoes in her mind
She will be found
When her feet hit the ground
