Anything

Neve

I won't wait on you no more
'Cause I've been guided by a private semaphore
And while you think I live in greed
I always make sure you get everything you needI won't feel free until there is reprieve
You see there is no truth to your beliefYou won't get anything, anything from me
You won't get anything, anything from me
I won't take everything, everything I need
But you won't get anything anything from meSo go ahead and live it up
'Cause you don't want to know
What I've been thinking of
You drink away 'till you can't feel
Well, now's the time, now's when it's for realYou're out of phase 'cause you wanted to be
Tripped out in a daze, but don't you want to be free?
For when it all comes 'round again sometimeYou won't get anything, anything from me
You won't get anything, anything from me
You don't say anything, you just sit there and you grieve
But you won't get anythingYou won't get anything, anything from me
You won't get anything, anything from me
You don't say anything, you just sit and disagree
You won't get anything, anything from me
