Who I Am

Kamarova

All alone in the dark
Now that I walk in a park
Sending me suddenly off a cliff
It's like you're dragging me down
I'm left 6 feet underground
And now I'm finding it hard to breathe
Days have turned into nights
And now I know that I'm done
You never called me by name
Think I want you to change
You think you know me
But you don't really know what I need
Said I take it too deep
You know you know me
But you don't really know who I am
Now I'm seeing the light
I've paid the toll of our fights
I'm driving away from you
I won't get stuck in the past
How could you think this would last
You're just a bump in the road for me
Days have turned into nights
And now I know that I'm done
You never called me by name
Think I want you to change
You think you know me
But you don't really know what I need
Said I take it too deep
You know you know me
But you don't really know who I am
