Fire With Fire

Scissor Sisters

You can see that you're being surrounded
From every direction
And love was just something you found
To add to your collectionIt used to seem we were number one
But now it sounds so far away
I had a dream we were running from
Some blazing arrows yesterdayYou said fight fire with fire, fire with fire
Fire with fire
Through desire, desire -sire, desire
Through your desireNow the city blacks out the sun
That you know is rising
You can show me the work that you've done
Your fears have been disguisingIs it just me or is everyone
Hiding out between the lines?
Where will we be when we come undone
Just a simple meeting of the minds?And we'll fight fire with fire, fire with fire
Fire with fire
Through desire, desire -sire, desire
Through your desireWe'll fight fire with fire, fire with fire
Fire with fire
Through desire, desire -sire, desire
Through your desireUnderneath your skies
There's a million lights, burning brightly just like firefliesIt's cold and heaven surrounds you
From every direction
'Cause there's someone behind every hand
That you've made a connectionAnd now we're free to be number one
The morning isn't far away
I had a dream we were holding on
And tomorrow has become today, become todayAnd now we're free to be number one
The morning isn't far away
We've got a reason to keep holding on
Tomorrow has become today, becomeAnd we'll fight fire with fire, fire with fire
Fire with fire
Through desire, desire -sire, desire
Through your desireWe'll fight fire with fire, fire with fire
Fire with fire
Through desire, desire -sire, desire
Through your desire
