# All I Got

## Ep!c

All I gotta do is sit around and wait
And all I gotta do is not anticipate
And every word I said I should have taken back
And all I gotta do is get my brain on track
And I know what you're thinking, yeah
That you know what's coming now
And everywhere I look
Everything is looking so good
Everyone is you
And I know I tend to rush straight in
I just don't know where to begin
When everyone is you, everyone is
And all I gotta do is just hold back and wait
But every time I try I make the same mistake
And all I gotta do is make myself relax
And all I gotta do is keep my brain on track
And I know what you're thinking, yeah
That you know what's coming now
And everywhere I look
Everything is looking so good
Everyone is you
And I know I tend to rush straight in
I just don't know where to begin
When everyone is you, everyone is
And I hope that you find it
If freedom is all that you want
I can see a silver lining
I'll be here time after time
Time after time after all
Everywhere I look
Everything is looking so good
And everyone is you
And I know I tend to rush straight in
I just don't know where to begin
When everyone is you
And everywhere I look
It is looking so good
And everyone is you
And I know I tend to rush straight in

I just don't know where to begin
When everyone is you, everyone is
