The Downward Dance

Treble Charger

Everybody gather 'round
Come and listen to me
You wanna know what I know
You wanna see what I seePay you money and you take your chance
When you decide to do the downward dance
Never even given half a glance
Try one more timeSomething happens all the time
You're gonna like it's a scene
Wouldn't miss it for the world
If you know what I meanPay your money and you take your chance
When you decide to do the downward dance
Know you'll be a slave to circumstance
When you go into the downward dance
Never even given half a glanceTry it one more time
And I'll make it rightNow the lights are down
And darkness surrounds
So you can't see mePay your money and you take your chance
When you decide to do the downward dance
Know you'll be a slave to circumstance
When you go into the downward dance
Never even given half a glance
