11:59

Doubledrive

Somewhere else it's still yesterday
In a little while it'll be right now
Continuum of both time and space
A disruption impossible
Go back a year now and where are we
Twelve months away from where we're going to be
Procrastination's not happening
So why put off today what you can do in a minuteMaybe it's tomorrow right now
11:59After it changes before your eyes
We're all metamorphosised
It's automatic baby
You're living in the now
And the cycle runs it's course
Just like it's done a thousand times before
What comes to pass must fall away
Tomorrow seems like it was only yesterdayMaybe it's tomorrow right now
11:59I don't know what's to follow
I'm in the now
11:59
