Colorado 5591

5591

a simple love song
a simple love gone wrong
a simple way to cope
with six years of lovestrong
then gonei speak of colorado 5591
where there's a paxil-plated morning sun
a hug every now and then from everyone
colorado 5591but would you take it away, boys?
take it away
would you take this pain away?
take it away
would you take it away, boys?
take it awayand through this mad parade i walked alone
and tried to find music to my own song
but the music too loud or the crowd too strong
i kept to myself, i kept aloneand many friends that i have lost
and many friends that i've found
we all wanna stay on common ground
we've got to find this common groundbut would you take it away, boys?
take it away
would you take my pain away?
take it away
would you take it away, boys?
take it away
