Fade Away

Stellar Road

I remember you
You're the one that i would run to
When shit got deep
We'd drink all night,
Sit and sing around the fire's bright;
Hell yeah we felt free.

We'd make our escape
Blinded by these simple waves in our lives
it's time to grow
and we will be binded by our memories
and still we'll be the same
We'll fade away,
fade away from trouble today
until we get weak.
And we'll rise above
until push comes to shove
my best friends and me.
Dance with me above the city
drink with me not to be empty
my best friends and me.

We'd run away
Spend all day out on the lake
Talking about evolution
Can't explain the care we share
Underneath these truths we bare
You're the reason i sing

I'm dreaming we're leaving i'll see you again
Will you remember friend?
