Clear the Air

Javier Colon

It might be that you don't feel like talking,
but just hear me out.
I know that this fight is far from over.
For we don't have to shout so loud to be heard
Maybe you're tired me working
long days, longer nights
Believe me, I know that you are hurting
But you can't blame me for all that's bad
And I like itHow did we get to this place?
How do it get away?
I don't even know who's right who's wrong here
Maybe we can try to start over,
I hope we can clear
Clear the air.
If you say that you don't really love me
then I'll show myself out
Can't you see that you're my one and only
After all this time you should know me, by nowHow did we get to this place?
How do we get away?
I don't even know who's right who's wrong here
Maybe we can try to start over
I hope we can clear
Clear the air.Maybe I can try to do better
Maybe she can meet me halfway
She wants to give up but I wont let her
Now if I had my... my way
How!
How did we get to this place?
How do we get away?
I don't even know who's right who's wrong here
Maybe we can try to start over
I hope we can clearHow did we get to this place?
How do we get away?
I don't even know who's right who's wrong here
Maybe we can try to start over
I hope we can clear
Clear the air.It might be that you don't feel like talking
oh, ooh
