Chemistry

Stereo Skyline

Oh, oh, oh, what's the chance of you and me?
The two of us in a make believe
3-D movie let's subtract the math
And talk about chemistry
She still counts on her fingers sometimes
But she looks oh so fine by my side
Well, isn't she something?
I just can't stop humming, no
And maybe, girl, you rock my world
Flip turn it upside down and inside out
Feeling just fine like we should alright
Rolling out of bed just to do it all again
Grab my shoes and walk right out the door
Girl, I couldn't ask for more
Oh, oh, oh, let's forget about math and history
The Milky Way, the galaxy
The gravity that's pulling you
Like glue right towards me
And maybe, girl, you rock my world
Flip turn it upside down and inside out
Feeling just fine like we should alright

Rolling out of bed just to do it all again
Grab my shoes and walk right out the door
Girl, I couldn't ask for more
'Cause the gravity keeps happening
To disappear when you are near
But you seem to be what's making
Me miss a beat
Maybe, girl, you rock my world
Flip turn it upside down and inside out
Maybe, girl, you rock my world
Flip turn it upside down and inside out
Feeling just fine like we should alright
Rolling out of bed just to do it all again
Maybe, girl, you rock my world
Flip turn it upside down and inside out
Feeling just fine like we should alright
Rolling out of bed just to do it all again

Grab my shoes and walk right out the door
Yeah, girl, I couldn't ask for more
