All I Want

Puressence

Self dissintergrating not worth educating
All I want to do is drag you down,
I climb out of my fox hole
my own sweet chicken pox hole,
All I want to do is snuff you outTell me if I could be like I was last night again,
trying to convince you that black was white again,
oh you say you know
I know you don'tI've got a picture in my mind,
sat on a chair near a broken blind with you,
A little scene left way behind,
sat in the church of the broken spine with you.Lay back watching football with no interest at all,
why can't I just never see it through,Tell me if I could be like I was last night again,
you could be wrong and be oh so right again,
oh you say you know I know you don't (x2)I've got a picture in my mind,
sat on a chair near a broken blind with you,
A little scene left way behind,
sat in the church of the broken spine with you.
