

# Stick Around

## WaterColor

Sneaking out, pick me up on a Friday night  
We don't know where to go but we'll be alright  
Your hand in mine, your foot on drive  
Nothing could kill this vibe  
Breaking in through the fence to the old arcade  
Your favorite game, always the same, play the night away  
Your hand in mine, you're by my side  
Til we run out of timeDoesn't matter where we go  
We could run away  
As long as we're together it's okay  
Feels like just a dream  
But I'm still awake and baby nothing's changingEverybody says we're so messed up  
But nobody knows I'm so in love with you  
And all you do  
All that really matters is  
When we are together my heart's on fire  
Breathing you in, you take me higher  
And I'm never coming down  
I really hope you stick aroundAll my friends think you're weird  
And they're probably right  
Not a thing that I'd change  
We're two of a kind  
The way you talk when you're asleep  
You're so perfect to meDoesn't matter where we go  
We could run away  
As long as we're together it's okay  
Feels like just a dream  
But I'm still awake and baby nothing's changingEverybody says we're so messed up  
But nobody knows I'm so in love with you  
And all you do  
All that really matters is  
When we are together my heart's on fire  
Breathing you in, you take me higher  
And I'm never coming down  
I really hope you stick aroundEvery night, lie awake  
You're stuck on my mind  
Really hope that you think about me all the time  
I never wanna let you go  
NoEverybody says we're so messed up

But nobody knows I'm so in love with you  
And all you do  
All that really matters is  
When we are together my heart's on fire  
Breathing you in, you take me higher  
And I'm never coming down  
I really hope you stick around  
I really hope you stick around
