Babel

Simiantics

Say it was your babel
Say it was my babel
It was my babel
Tell all people
Now you know it's over rolling off her shoulder
You can take a ladder to the shadows and forget
Was it how she kissed you and then dismissed you
Was it purposeful and was it just to hook you in
Hallucinating, chasing, changing, racing
Breaking, hating till you lost it all
Where was your girlfriend, she was not going
Where you were going, you're on your own
He was quick to burning, he was slow to learning
Though inside you're misted he still kissed her when she cried
And did your best to please her, you're getting up and leave her
You befriended the harsh way it ended now sleep tight
Hallucinating, chasing, changing, racing, gracing
Breaking, hating till you lost it all
