Make My Day

The Heart Throbs

Woke up late
World won't wait
So I make my way downstairs
Mom freaks out
Please don't shout
I still have to dry my hair
I've been up all night
Just thinking you're the one
Who's in my dreams
My heart just keeps on jumping
When I think what we could be
Just go ahead and make my day
You make the world just melt away
When things go wrong and skies are gray
Just make my day, make my day
Second bell
Show and tell
At my locker down the hall
Heart in throat
See your note
And it turns out after all
You've been up all night
Just thinking I'm the one

Who's in your dreams
Your heart just keeps on thumping
When you think what we could be
Just go ahead and make my day
You make the world just melt away
When things go wrong and skies are gray
You just make my day, make my day
We're holding hands
We're walking home
We don't know what to say
But later on
I read your text
You made my day
Here we go! Ha!
Just go ahead and make my day

You make the world just melt away
When things go wrong and skies are gray
You just make my day
Just go ahead and make my day
You make the world just melt away
When things go wrong and skies are gray
You just make my day, make my day
You just make my day
