# Full Of Stars

## Turin Brakes

I'm gonna get me a bone today
Under the big blue sky
Under the tree where my last love laid
Now where beneath the leaves she liesI'm goin' to dig a deep hole
And crack open this bone
See where all the wonder went
See where now it's all goneLook at the light
It's full of stars
What's really happening?
Something wonderfulIt's not as bad as I was told
To lose all that was loved
It's the demons who drag you down
But the angels pull you upDon't let the colors bring you down
They'll get much brighter one day
You know all things will come around
If you leave them in their swayI'm goin' to save it all in these photographs
Keep something here for me
When I'm dead and gone, I'll laugh last
At what's left here to seeLook at the light
It's full of stars
What's really happening?
Something wonderfulIt's not as bad as I was told
To lose all that was loved
It's the demons who drag you down
But the angels pull you upLook at the light
It's full of stars
What's really happening?
Something wonderfulIt's not as bad as I was told
To lose all that was loved
It's the demons who drag you down
But the angels pull you up
