Whispering Endearments

Ari Herstand

Whats the name that you speak
when you close your eyes and fall to sleep
Am I the one in your dreams
or when you wake will you leave meLast night you breathed into my ear
whispering endearments unclear
You never spoke that way to me before
I just hope its me you meant them forIm waiting for you to break my heart
so I can move on with life and restart
I am stuck inside your every move
Im waiting for you to break my heartWe go out on the town
I take your hand spin you aroundYou turn to me and lock eyes
and for a moment I lose my sightIts not that I cant be alone
on the contrary Ive lived till now on my own
But every time I make you laugh
you tickle my heart and Im right back in loveIm waiting for you to break my heart
so I can move on with life and restart
I am stuck and dont know what to do
Im waiting for you to break my heart
