Blue Skin

Nothingface

I got my green eyes, I got my glass high
I got my thunder and it's rolling straight up inside
She's got the real, gave me a face lift
We got this spaceship and we're just a dot in the skyInto the sun, return as nothing
Into the sun, return as nothingI got machine guns and yes they're lots of fun
We got some bullets and we're mowin' everybody down
I got my blue skin and eat my dinner in sin
I got my pride now and I'm all shook up insideInto the sun, return as nothing
Into the sun, return as nothing
Into the sun, return as nothing
Into the sun, return as nothingMy mother said that all we're angels
But I swear I saw the evil
Evil that bleeds from the sky, from the sky
From the sky, from the skySo I can't help you now, you saved it for yourself
But you stole everything so you can see it when you
Wake up, you know there is nothing to worship
So fuck you, fuck her, fuck himThey'll kill everyone, we've got to stop them!Off into the sun, return as nothing
Into the sun, return as nothing
Into the sun, return as nothing
Into the sun, return as nothingWe will spread to every continent
And devour every living thing on the face of the earthInto the sun, return as nothing
Into the sun, return as nothing
Into the sun
