Surface

Denali

All through my mind all the time
There's no right moment for signs
Wish no one was lost or around
I'll do it to you
Back and forth is this worth all the going through
Surfaced, I'll take it back
So nervous, I said I'll take it back
A secret so hard to hide it'll blow your mind
Heads up, shred all the evidence for a downhill ride
No one feels like I do
Some say it's all over
erase all the colors
save the others
walk into it and you will find
If it's wrong or right show me now
All through the night
unless it's found
A wicked effect inside
It'll blow your mind
No rest just test it out
You can't afford this time
No one feels like i do
Some say it's all over
Erase all the colors
Save the others
Some say it's all over
Erase all the colors
Save the others
Walk into it and you will find
