Blood

Chris Singleton

I see the happy family tree
It sways so easily
We're smiling all the time
This world just isn't mine
We watch it burn and we never learn
This can't be what you're waiting for
Staring into the sun, we eat our young
This can't be what you're waiting for
Just take it easy on yourself
Forget all the stupid things we say

I know you beat up on yourself
I know, I know it's in your blood
You say what no one understands
The seeds are in your hands
The branches break your bones
I can't just leave you alone and watch you squirm
And I can't bring myself to look
I rip the pages from the book and watch it burn
It's in your blood
