Better To Believe

Israel Houghton

What I wanna say now is a message for the people
Who have storms in your life, we gotta work it out
Let me say it once now then again for those who need it
In these troubled times, let's try to work it outAnybody ask you tell 'em you don't need a reason
To believe me now, we're gonna work it out
And if you want me then I'll tell them
Like you told me a hundred thousand times we can work it outMaybe you know how it feels
Maybe sometimes it all comes down to what is real
It ain't always what it seems
Still it's better to believe than to have seenLet me get you say now with as much as you can feel it
In your own design, we can work it out
Don't you be afraid, child, ain't no reason to conceal it
This is your good time, let's try to work it out
If the spirit moves ya, let it lose ya in the groove of what you know is rightDo you know what I mean?
Is it something you just can't receive?
And it's not what it seems
Still it's better to believe than to have seenDo you know what I mean?
When I say it comes down to what is real
Maybe it's not what it seems, oh yeahStill it's better, still it's better
Still it's better, better to believe
Still it's better, still it's better
Still it's better, better to believeStill it's better, still it's better
Still it's better, better to believe
Still it's better, still it's better
Still it's better, better to believeStill it's better, still it's better
Still it's better, better to believe
