Ashes, Ashes

Opus DÃ¤i

I hope this terrifies you
a moral suicide which burns inside you
and it never lets you out
Until you realize youre knee deep
or buried alive in liesGo, go, go believe
Its everything you need
Take everything for granted
Distorting every memory
when you take them as your own
'cause You like it when you know
Just what i'm thinkingI hope this terrifies you
a moral suicide which burns inside you
(and it never lets you out)
Until you realize your knee deep
or buried alive in lies
This time I wont let you winwhen you scream like a child
we Act like children
who run from their problems
Blurring the visions we set in our sights
So open your eyes
(.....)
and The kids are screaming at the tops of their lungs
While they are pointing their fingers like theyre loaded guns
Behind the curtains and backdrops
the fire sparks
if these bridges burn we all fall down
We all fall down
We all fall down
We all fall down
We all fall downI hope this terrifies you
I know it terrifies you
I'll be ok just go just go
just go just go
let the bridges burn
we all fall down
