Love Is Still Alive

Bosson

Our love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still aliveYou say that our love is gone and
Whatever we did was wrong and
That everything we built is now history, yeah
You've taken my heart away and
I can't seem to make you stay but baby, I believeOur love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still aliveI've given it all to you and
I've been living my life through you and
I'm not gonna give in now, we've come too far
That we're gonna work it out
And even if you still doubt it, baby, I believeOur love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still aliveLove is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still aliveBelieve me, things will get better
Hold me, I'm more than a friend
Trust me, I promise you one thing
I'll stay with you till the endOur love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby, our love, our love is still aliveLove is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still aliveLove is still, still alive
And all I want is just to be by your side
And all I'm asking you is to give me one
Just give one, one more tryI know that the future has a place for you and I

'Cause baby our love, our love is still
Our love is still, still aliveOur love is still, still alive
And all I want is just to be by your side
And all I'm asking you is to give me one
Just give one, one more try
