Future Memories

Somaton

From a starting point
At the present time
Follow a straight line
Eventually we know the you'll
End up behind
Immediately find
At the present time
The point to fathom is
And to find
Eventually close behind
The future's in our memories
Our past is just a guess
The point at where they meet is
Now the place to exist
A past to recollect
True, false and meaningless
Approaching as we sail the channels
As vessels where we exist
Deem another day
True, false and just a guess
Approaching as we find the vessel
To channel where you exist
The future's in our memories
Our past is just a guess
The point at where they meet is
Now the place to exist on the way
