What You Wanna Hear

Rufio

I see you're laying in my shadow
and I know it's you that matters
and my mind is so desperate
So I'll stop
I won't let you just walk on by
I won't let you just walk on by
If only I could think of what you wanna hear
I can be a creep or (?) my life's over
Now believe, I see how much you mean to me
Think about the moment, look me in the eye
Tell me that you want to give it a try
And your make believe could be our reality
Cut my ties and my heartache
'Cause nothing matters any more
This time is so perfect
I'll look back
I won't let you just walk on by
I won't let you just walk on by

If only I could think of what you wanna hear
I can be a creep or my life's over
Now believe, I see how much you mean to me
Think about the moment, look me in the eye
Tell me that you want to give it a try
And your make believe could be our reality
Well the toughness still, in a moment turns real life
I struggle through my mind
But still have no words to say how I
Just know it could be right
But now I've got an answer in the light
the moment passed me by
If only I could think of what you wanna hear
I can be a creep or my life's over
Now believe, I see how much you mean to me
Think about the moment, look me in the eye
Tell me that you want to give it a try
And your make believe could be our reality
