Christmas Magic

Ali Lohan

Every year December comes smiling faces on everyone
There's magic in the air spending time with family putting up the Christmas tree
Lights are going up everywhere strangers and friends every boy and girl
Spreading joy around the worldThat's Christmas magic...It makes the world come together
Things get better...magic (makes things happen)
Its Christmas magic...All those who don't get along
Forget who's right or wrong...Its magic (makes things happen)
That's magic...That's magicPeople think of others first looking for good things and not the worst
Giving gifts to show that they care there's excitement in our soul
Its the same thing for young and old its a time that we all shareA magical time for all the boys and girls
Shared by all around the worldThe reason the season blessings sent from heaven
The peace and the giving jingle bells are ringing
The cheers and the laughter nothing else could matter
The love and the gladness... (around the world)
