You Fool

Rahim Quazi

It's in your eyes, it's in your smile
You couldn't hide it if you tried
You can't deny, it's on your mind
And I won't lie to you, I feel it too
Just close your eyes and kiss me, you fool
What are you waiting for, it's just me and you
This moment is yours, you know what to do
Just pull me close to you, you fool
Without words, without a sound
I can still hear you speak
Don't be afraid, there's no doubt
There's something between us
To believe in, oh

Just close your eyes and kiss me, you fool
What are you waiting for, it's just me and you
This moment is yours, you know what to do
Just pull me close to you, you fool
It's all in your hands
So hold me while you can
Don't let this go
You fool, you fool
What are you waiting for?
Kiss me
You know what to do
Just pull me close to you, you fool
Kiss me
