# Pornography

## amillion&9

Wearing inside-out underwear and an outside-in smile
I'm just waiting for my heart attack but it could take a while
It's too early for the day to break and too late to try again
My make-up makes a different face but the mirror's not my friendOh I'm aware that it ain't rocket science and we all make mistakes
We are chemists sent from something high to save the human race
Oh I fall asleep to pornography and want to hate you still
But mercy's been relayed to me
Life's so fair I could kill
My wisdom teeth are coming in so I know what to do
I'll fall asleep to pornography
But it's of me and youWhen I forgive your mistakes you won't have a clue
Cause we've grown up in earthquakes where the second chance is few
But each day-break we'll wake up and look at things so new
Cause really you are good for me and I am good for youOh I'm aware that it ain't rocket science and we all make mistakes.
We are chemists sent from something high to save the human race
I'll fall asleep to pornography and want to hate you still
But mercy's been relayed to me
Life's so fair I could kill
My wisdom teeth are coming in so I know what to do
I'll fall asleep to pornography but it's of me and youI'm sure I'll screw up something too
But then again
It's true we both flew fast to meet
for being just human
So things are gonna get bumpy, baby, but even mountains do
Through everything your good for me and I'm too good for youOh I'm aware that it ain't rocket science and we all make mistakes
We are chemists sent from something high to save the human race
Oh I fall asleep to pornography and want to hate you still
But mercy's been relayed to me
Life's so fair I could kill
My wisdom teeth are coming in so I know what to do
I'll fall asleep to pornography
But it's of me and youOh I'm aware that it ain't rocket science and we all make mistakes
We are chemists sent from something high to save the human race
Oh I fall asleep to pornography and want to hate you still
But mercy's been relayed to me
Life's so fair I could kill

My wisdom teeth are coming in so I know what to do
I'll fall asleep to pornography
But it's of me and you
