You've Had It With You

Paul Westerberg

I had it with the friend who uses me
To open doors like I was a skeleton key
I had it with everyone, had it with anyone I ever knewYou've had it with you, you need someone to fall in love
Need someone to fall in love, any anyone will do
You've had it with youLike Catherine the Great underneath a big horse
Your sexual preference is me of course
I get away with murder and I promise not to hurt her
If I have to shootLike Catherine the Great underneath a big horse
Your sexual preference is me of course
I get away with murder and I promise not to hurt her
If I have to shootHad it with you, had it with your shoesHad it with you baby and your star-cheap car
I'm fading faster than a UK pop star
I've had it with everyone, everyone I ever knew well I doHad it with you baby and your star-cheap car
I'm fading faster than a UK pop star
I've had it with everyone, everyone I ever knew well I doYou had it with your neighbors, had it with your clothes
You had it with your records, [unverified]
You had it with your friend, had it with your shoes
You had it, goddammit, you've had it with you
And you've had it with me too
