Fuel Me

Crush 40

I can feel you comin' up on my heels
Can you feel the thunder behind my wheels
Just you try to take me
Just you try to take me
I will dust you back right where you came
One way is my way
Your way don't even try
Feel my fever burning you up inside
Taste my passion floor you pass it by
Eat my bittersweet dust
Hear my roaring fuel thrust
Ain't no way you're ever ever getting by
One way is my way
Your way don't even try

All in all your time is running out
You will just leave here without
Running down on the final pace
Run you out into last place
Fuel me I can't live without
Guitar Solo
One way is my way
Your way don't even try
All in all your time is running out
You will just leave here without
Running down on the final pace
Run you out into last place
Fuel me I can't live without
