step off

Lager Lads

You sure look pretty in your glass house
You probably think youre too good to take the trash out
Well are you dumb or are you blind
Cause its a real fine line
Between telling a joke and turning a knife
Dont wreck my reputation
Let me wreck my ownStep off, step off
Yeah youre getting too close to me
With all your negativity
Just get lost
Im just trying to make a difference here
So why you gotta interfere
Just keep climbing that mountain, your dirty tricks
When you finally get to the top
Step off
YeahScrewed everybody over in this town
There aint nothing between you and the cold hard ground
Keep running your mouth its catching the truth
You just might find a hole in your parachute
Whatever gets you high
Will always bring you downSo step off, step off
Yeah youre getting too close to me
With all your negativity
Just get lost
Just trying to make a difference here
So why you gotta interfere
Just keep climbing that mountain, your dirty tricks
When you finally get to the topSticks and stones may build a throne but
Youll be up there all aloneSo step off
Yeah yeah step off
Keep climbing that mountain your dirty tricks
When you finally get to the top
Step off, step off, step off
