Detox

Darke Complex

Turn around
Kick back and relax like it's nothing
You try to play me and sway me to make me think I mean something

Shut your mouth
Don't think for a second you had me
No time for leeches, I mean this; when you read this, know I'll be laughing

It's over now
[Come on, come on]
All over now
[Come on, come on]

I'm purging you from my mind
And leaving you behind
Haha, I'm sick of playing these games
I'm rearranging the frame
You'll never change
I'm taking aim like
I'm purging you from my mind
And leaving you behind
As time flies I won't remember your face
All that remains is the space you wasted
Inside of my brain

Turn around
You can live a disposable life
But just 'cause you threw away yours doesn't mean I'll let you steal mine

Shut your mouth
Just know, when the door shuts on you
Don't you come here begging and fretting claiming that you never knew

It's over now
[Come on, come on]
All over now
[Come on, come on]

I'm purging you from my mind
And leaving you behind

Haha, I'm sick of playing these games
I'm rearranging the frame
You'll never change
I'm taking aim like
I'm purging you from my mind
And leaving you behind
As time flies I won't remember your face
All that remains is the space you wasted
Inside of my brain

Now I'm embracing this revelation
You've pushed me to confrontation
So bring it

I'm watching you give up for my amusement
You're talking, but I wanna see you do it
Your jaw is moving but your words are useless
You hardly started and you're losing

Bring it
I'm watching you give up for my amusement
You're talking, but I wanna see you do it
Your jaw is moving but your words are useless
You hardly started and you're losing

Bring it
I'm watching you give up for my amusement
You're talking, but I wanna see you do it
Your jaw is moving but your words are useless
You hardly started and you're losing

Bring it
Come on, come on (x4)

I'm purging you from my mind (x2)
And leaving you behind
Haha, I'm sick of playing these games
I'm rearranging the frame
You'll never change
I'm taking aim like
I'm purging you from my mind
And leaving you behind
As time flies I won't remember your face
All that remains is the space you wasted
Inside of my brain

Bring it
Come on, come on (x2)
