Morning Star

N-Dubz

Morning star, you're my morning star
Star, star, starYou're my morning star
You're the one that I love shine so far
The one that I'm waiting for, oh
The one that I'm wishing for, oh, ohYou got me wishing on a star
When I can be where you are
I'm hoping I'll see you soon
Before you travel too farDon't go too far, don't go, don't go
I just got a chance to know you
Don't go, don't go
There's still so much more I could show youYou're my morning star
I wanna be wherever, ever that you are
'Cause you shine, shine your light straight through my heart
Straight through the dark, straight through the dark
You're my morning starYou got me wishing on a star
When I can be where you are
I'm hoping I'll see you soon
Before you travel too farDon't go too far, don't go, don't go
I just got a chance to know you
Don't go, don't go
There's still so much more I could show youAh, you go me wishing on a star
Thought we never be apart
From down here, you're way too far
Want you with me on my journey
Like you've been here from the startWe don't wanna be anywhere without you
This ain't like them other times you've been lied to
Where would I be if I was without you
Couldn't be with another if I tried toYou got me wishing on a star
When I can be where you are
I'm hoping I'll see you soon
Before you travel too farDon't go too far, don't go, don't go
I just got a chance to know you
Don't go, don't go
There's still so much more I could show youDon't go too far, don't go, don't go
I just got a chance to know you
Don't go, don't go
There's still so much more I could show you
