Virtual Loser

Teen Idols

In a modern evolution there are brand new creatures
Classified loosely as technology freaks
Always searching cyberspace for upgraded features
Ridiculed by others, labeled retards and geeksI want to pull the plug and cause your system to crash
But then where would you be?
With no heated up discussions in an internet chat
You look like a helpless, virtual loser to meVirtual, virtual, virtual loserTheir closest human contact
Is through a keyboard and mousepad
But you can't take a computers to the senior prom
To reach 'em write loser care of mommy and dad
or www.loser.com
