

# Vanished

Jimmy LaFave

I saw you there across the room  
My heart was falling way too soon  
And I knew  
That like the ancient Siren's Song  
I could not hold out very long  
Being close to you  
So I played my part  
And you took my heart  
And scattered it in pieces  
All around  
Where I could not be found  
And then you vanished away  
Sometimes it's like a dream  
That you were even standing there by me  
With your face  
And fate has made me pay the cost  
To find my love then realize that I, I have lost  
And time stood still  
And I guess it always will  
For nothing is as constant as the sound  
Of my world turned upside down  
When you vanished away  
Please try and understand  
The timeless love that has slipped right through the hands  
Of eternity  
That was truly meant to be  
That vanished away
