Earthquake

Matt Cab

She got me going crazy thinkin bout the things we used to be
All the things she meant to me, how she said she'll never leave, ohh
Don't know how it happened but it seems like it was yesterday
When everything I did made you smileAnd now I don't know left from right
You turned my whole world upside down
And wont you, come save me now
So won't you come save meIt's like an earthquake, shaking up the way I loved you
I wanna come to your rescue (but I'm all out of love, I said I'm all out of love)
It's like an earthquake, shaking up the way I loved you
I wanna come to your rescue (but I'm all out of love, I said I'm all out of love)I wish I could press rewind to the days when you were mine, yeah
I'd pull back the hands of time and everything would just be fine, yeah
But everything's so messed up now, how'd get so complicated? (so complicated)
You were like a work of art but girl somehow we faded (faded)And now I don't know left from right
You turned my whole world upside down
And wont you, come save me now
So won't you come save meIt's like an earthquake, shaking up the way I loved you
I wanna come to your rescue (but I'm all out of love, I said I'm all out of love)
It's like an earthquake, shaking up the way I loved you
I wanna come to your rescue (but I'm all out of love, I said I'm all out of love)
