The Heat

Good With Grenades

Lights out
Turn up the heat
Ive got a sick hot theme
If ya know what I mean
And if you keep it in check
I swear I'll play niceI've got you on the floor
Arms open wide
You have no choice
'cause now they're tied
The beast is out of his cage
And now it's your timeSo breath, breath
I've got you on your knees
She's a tease
I hold the keys
Exposed and shaken up
I suppose we're making loveGood, good
You're getting it down
Let's step it up
Slip off that red night gown
You've followed procedure
Now it looks like you need to
Get on to get me offSo breath, breath
I've got you on your knees
She's a tease
I hold the keys
Exposed and shaken up
I suppose we're makin loveAbove all else girl
Please yourself
Place your standards
On the shelf
Tonight is right
To do me wrong
And I'll close my eyes
And play alongIf I hold you down
I want you to scream
Do what you feel girl
But follow the theme
'cause you change everything
I know it's hard to believe

You're the star of the show girl
But don't forget to screamLights out
Turn up the heat
I've got a sick hot theme
If ya know what I mean
And if you keep it in check
I swear ill play nice, I'll play niceSo breath, breath
I've got you on your knees
She's a tease
I hold the keys
Exposed and shaken up
I suppose we're makin loveAbove all else girl
Please yourself
Place your standards
On the shelf
Tonight is right
To do me wrong
And I'll close my eyes
And play along
