

# What Is Love

## En Vogue

There's a question with so many answers  
No one knows them all, no  
No high powered scholar, high paid by the hour  
Could come up with the answers to this complex question  
What is love? I gotta know  
What is love? I just gotta know  
What is love? I gotta know  
What is love? Love, love  
What is it, what is it?  
Love, love  
What is it, what is it?  
Love, love  
What is it, what is it? How is that we can make mass destruction  
With one single bomb?  
But can't find a solution to one simple problem  
That's troubled us all  
Why is it that we can make smart computers  
That think for themselves?  
But can't make a computer to match lonely people  
With one thing in common to fall in love with each other  
What is love? I wanna know  
What is love? Really gotta know  
What is love? I wanna know  
What is love? Love, love  
What is it, what is it?  
Love, love  
What is it, what is it?  
Love, love  
What is it, what is it? Maybe one day they'll make up a word that sums up love  
That won't be so complex and fits in with the rest  
But for now we are stuck  
With this word and no luck  
What is love? I wanna know  
What is love? Now somebody tell me so  
What is love? I wanna know  
What is love? What is love? I want to know  
What is love? Somebody, somebody tell me so  
What is love? I really wanna know  
What is love? I want to know it now, now  
Love, love  
What is it, what is it?  
Love, love  
What is it, what is it?  
Love, love

What is it, what is it?

...
