Little Sun

Blues Pills

When the night is lonely
And you got no place to go
Cover your eyes,is a falling
The other side is calling

All the world is left alone
Still remember where you told me
You never leave me on my own
Where are the ones I used to know?

Mountains falling all around me
And the ocean overflows
I drown and shaking up to leave me
A spinning world without control

The other side keep on shinning
Though itâ€™s you who has to know
When the dark creeps on behind you
Itâ€™s when you leave behind to glow

Little sun just keep on shinning
You little sun just keep on shinning
Little sun just keep on shinning
Hey little sun,just keep on shinning
