Time to Wake

Top Shelf

Some of them say that the bad men
And wicked will fall
I say we need more teachers
To teach the small
The youth becoming prisoners
They building the wall
We can't stand aside and watch this anymore
The youth are falling
The youth in trouble
The youth need help
On the double
It's everywhere you lookI just can't stand the rain
It's time for us to wakeAll these women all around
Being programmed to look
Just like the figures in a Fairytale book
Taught to pick apart themselves
Not love the way they look
It's all a big poly on Americas hook
It's everywhere you lookI just can't stand the rain
It's time for us to wakeWith so many things gone awry
In this world we live today
Seams hard to find the time
To sit or pray
But we have the voice inside which fights
For freedom every day
But sometimes we get clouded up
By medias mad ways
Trying to fear us all into doing just what they say
Little do they know
The people rising up every day
We all go on a moveI just can't stand the rain
It's time for us to wake
