Fairytale

Anthony Melillo

Remember when we walked along the beach and
We watched the water dance around our feet and
And I could think of a thousand reasons
I think the made a movie about thatRemember when we sat upon your roof and
We watched the stars as they were slightly moving
Maybe it was just me and you girl
I think they made a movie about thatAnd all we need to make this story trues
A little bit of me and you girl
I just want you to see that
Our love is like a fairytale to me.
Whoa, whoaRemember when I said I love you forever
Two weeks later, break up was for better
One week after, we were back together
I think they made a movie about thatRemember when we walked along the street and
A single light was shining down on you and me
I was so nervous I couldnt see girl
I think they made a movie about thatAnd where we go, its only up to you
And who you know its only up to you
And if you show, its only up to you
But its up to both me and youLife is like a fairytale or movie
With pirate ships and pieces really groovy
We got butt loose making a smoothies
Yeah, thats why I made a movie about usAnd all we need to make this story trues
A little bit of me and you girl
I just want you to see that
Our love is like a fairytale to me. Whoa, whoaAnd all we need to make this story trues
A little bit of me and you girl
I just want you to see that
Our love is like a fairytale.
