Sun Goes Down

David Jordan

Open your eyes 'cause another day is dawning
Children of the night, can you hear them all calling?
Skies open up and the angel starts falling
Listen to the beasts, can you hear them hollering?Start in the morning, through to the evening
Dance like you are the only one around
Move like you want it, groove like you need it
Dancing it up till the sun goes downFree your mind 'cause tonight we're gonna break it down
Shake it, make it funky down
Get so high as the toxins in your body
Are the bass and the drums and the rah, rah, rah
We're right on time and all is fine
If you've lost your senses, here have mine andLose yourself from the time you awake
Till the evening time, till the sunshine breaksAh, come on
Open your eyes 'cause another day is dawning
Children of the moon, can you hear them all calling?
Skies open up and the angel starts falling
Listen to the beasts, can you hear them hollering?Start in the morning, through to the evening
Dance like you are the only one around
Move like you want it, groove like you need it
Dancing it up till the sun goes downTill the sun goes downWelcome all to the amazing the hysteria
Are you feeling what we bring to y'all
Peace and love and you're also getting low tonight
Tonight, tonight, tonightFire's burning on
And so there's children in the forest playing
Just come forget this too
Because the beast is hunting for its prey
Yeah, no, no, yeah, eeyyTill the sun goes down
Till the sun goes down
Sun goes down, sun goes down
Sun goes down, sun goes downOpen your eyes 'cause another day is dawning
Children of the night, can you hear them all calling?
Skies open up and the angel starts falling
Listen to the beasts, can you hear them hollering?Start in the morning, through to the evening
Dance like you are the only one around
Move like you want it, groove like you need it
Dancing it up till the sun goes downSun goes down, yeah, hahStart in the morning, through to the evening
Dance like you are the only one around
Move like you want it, groove like you need it
Dancing it up till the sun goes down

Yeah, yeahTill the sun goes down
Till the sun goes down
Till the sun goes down
